PROFESSIONAL EXPERIENCE

Welevel

May 2025 – July 2025

Working Student Quality Assurance & Game Tester

Munich, DE

- Reviewed and tested new gameplay features and quests in Unreal Engine 5, providing detailed feedback to ensure a coherent player experience.
- Identified, documented, and tracked bugs and design inconsistencies using Jira, collaborating with developers to ensure timely resolutions.
- Conducted playtests to analyze user pain points and created research tickets for the UX team to explore better design solutions.
- Tuned and tested various gameplay parameters within Unreal Engine 5 to improve game feel and overall user experience.

Mosu Games

October 2022 – June 2024

Game Developer & Co-Founder

Istanbul, TR

- Designed and scripted core gameplay systems, quests, and events for web-based games, including "Superkill.io" and "Space Survivor".
- Led the design and implementation of game mechanics with a focus on storytelling and pacing, from initial concept to final release.
- Collaborated with external partners for porting projects, aligning technical scripting requirements with design and business goals.
- Managed product strategy and feature prioritization, ensuring a cohesive experience across all game elements.

Playable Factory

February 2022 – September 2022

Game Developer

Istanbul, TR

- Developed and scripted interactive ad products using JavaScript (Phaser, PIXI.JS), focusing on creating engaging, story-driven content.
- Iterated on gameplay and content based on performance data and client feedback to enhance user engagement.
- Collaborated with clients to translate their requirements into functional and compelling scripted experiences.

EDUCATION

Technische Hochschule Ingolstadt

Masters's Degree Design Leadership

October 2024 – Present
Ingolstadt, Germany

- Focus on user-centered design, interdisciplinary innovation, and strategic leadership in creative projects.
- Relevant coursework: Project Design Prototyping, Design Leadership Methods, Creativity Methods in Business.

Istanbul Technical University

Bachelor's Degree Mathematical Engineering

September 2016 – June 2021
Istanbul, TR

- Provided a strong foundation in algorithmic thinking, data analysis, and statistical modeling, underpinning game programming concepts.

Technical Skills

- Scripting Languages: JavaScript, GDScript, Python, C, SQL
- Game Development: Godot, Unreal Engine, Unity, Phaser3, PIXIJS
- Game Design: Quest Design, Gameplay Scripting, Level Flow Pacing, Boss Encounter Concepts
- Management & Documentation: Jira, PowerBI, Trello, Miro
- AI & Creative Tools: ComfyUI, Stable Diffusion Models, Blender, Autodesk Fusion

Languages

- English: Fluent
- German: Basic
- Turkish: Native

Soft Skills

Cross-functional Collaboration	Problem-solving	Attention to Detail
Research & Analysis	Prototyping	Documentation

PROJECTS

Superkill.io

Godot, Hathora, Blender

Designed and developed a real-time multiplayer shooter, scripting dynamic controls, player abilities, and game mode logic.

Space Survivor

JavaScript, Phaser, Spine

<https://www.crazygames.com/game/space-survivor>

Solely designed and scripted a 2D rogue-like, implementing enemy wave patterns, player progression, and random event systems.
