PROFESSIONAL EXPERIENCE

Working Student QA & Game Tester

Welevel | Munich, DE | May 2025 – July 2025

- Tuned parameters in Unreal Engine 5 to optimize user experience and game feel.
- Conducted playtests to identify user pain points and created research tickets for the UX team to improve solutions.
- Reviewed GitHub pull requests and managed bug tracking via Jira.

Co-founder & Game Developer

Mosu Games | Istanbul, TR | October 2022 – June 2024

- Designed and developed web-based games using JavaScript (Phaser, Three.js) and Godot, managing the full pipeline from prototyping to release.
- Built a multiplayer backend using Hathora and MongoDB, handling real-time database interactions.
- Managed the development team to meet deadlines and partnered with external companies for web porting.

Game Developer

Playable Factory | Istanbul, TR | February 2022 – September 2022

- Developed playable advertisements using code-based frameworks like Phaser, Three.js, and Pixi.js.
- Iterated products rapidly based on customer feedback and strict weekly deadlines.

AI Researcher & Software Developer

Yapı Kredi Teknoloji | Istanbul, TR | September 2020 – January 2022

- Researched and built NLP models, working on data labeling and improving existing model performance.
- Developed automated web scraping and crawling tools to gather and analyze large datasets.

EDUCATION

M.A. Design Leadership

Technische Hochschule Ingolstadt | Ingolstadt, Germany | October 2024 – Present

- GPA: 1.5. Focus on interdisciplinary innovation and user-centric design leadership.
- Current Thesis: Developing "Kawadachi," a productivity tool using Godot.

B.Sc. Mathematical Engineering

Istanbul Technical University | Istanbul, TR | September 2016 – June 2021

- GPA: 2.1. Relevant Courses: Game Theory, Data Structures, Computational Mathematics.

SKILLS

- **Programming Languages:** JavaScript (Phaser/Three.js), Godot (GDScript), Python, C, SQL, SvelteKit.
- **Technical Knowledge:** Multiplayer Architecture, Game Loop Logic, Git, Jira, REST APIs, 3D Printing.
- **Programs:** Godot, Unreal Engine 5, Blender, Figma, Docker, Github, Aseprite.
- **Soft Skills:** Analytical Thinking, User Research, Agile Methodology, Project Management.

PROJECTS

Kawadachi enescakar.itch.io/kawadachi

Godot, Jira, PowerBI

- Developing a wellness companion tool for remote workers, featuring a transparent window architecture designed from scratch in Godot.

Superkill.io cdn.enescakar.com/Superkill/

Godot, MongoDB, Figma

- Created a Real-Time Third-Person Multiplayer Shooter; handled both the UI/UX design and the technical implementation.

Space Survivor crazygames.com/game/space-survivor

Phaser, Spine, Trello

- Designed and coded a 2D roguelike survivor game solo, managing the entire asset pipeline and game logic.
